It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.

It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: The supplemental response filed 5/14/08 corrects many of the problems pointed out in an earlier conversation. However, the insertion of "one or more polyhaloalkyl radicals" to make claim 4 a proper dependent claim, is broader than that originally described which permits a total of only 3 substituents on the Ar2 ring. It was suggested that the phrase be deleted in 1 and 15-17 and following "alkyl substituents" appearing on the same line as Ar2, the following be inserted: which can be substituted with one or more halo radicals. This phrase is consistent with the description in the specification . Ms. Barbosa authorized the change be made via an Examiner's Amendment.
